

SUNITA

AI/ML Engineer | Computer Science Engineering Student
+91 78884 21425 | sunitagolay001@gmail.com | <https://www.linkedin.com/in/sunita-golay-473202329/>

Education

Panjab University, Chandigarh 2024 – 2028

Bachelor of Engineering (B.E.) – Computer Science Engineering

Class X — Kendriya Vidyalaya | 92%

Class XII — Kendriya Vidyalaya | 78%

Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOP, Machine Learning

Experience

AI Intern — Tripple One Solution, Noida | June 2026-Present

- Contributed to AI-focused real-world projects involving problem analysis, solution development, and technical implementation.
- Applied Python, machine learning, NLP, and Generative AI concepts to develop and improve practical AI solutions.
- Collaborated on project requirements, experimentation, debugging, and implementation while following software development best practices.

Campus Ambassador — Unstop 2026 – Present

- Promoted hackathons, competitions, internships, and career opportunities among students.
- Engaged with student communities through digital outreach and encouraged participation in relevant opportunities.

Social Media Manager — GDG On Campus PUSGRC Aug 2025 – Present

- Panjab University
- Managed digital campaigns and promoted workshops, hackathons, and technical community events.
 - Supported event promotion through social media content and coordinated communication for community activities.

Projects

Visual Content Recommendation & Discovery System

- Python • ML • NLP • Embeddings • FAISS • Streamlit
- Built a personalized content recommendation system using embeddings and FAISS-based semantic similarity search.
 - Combined user preferences and interaction history to deliver relevant content recommendations
 - Developed an interactive Streamlit interface focused on personalized discovery and content search.

Retrieval-Augmented Generation (RAG) System

- LangChain • FAISS • ChromaDB • Embedding Models • LLM Integration
- Built a production-ready RAG system from scratch combining document indexing with semantic search.
 - Retrieved relevant context before LLM generation, improving response accuracy and reducing hallucinations.
 - Implemented embedding models, vector databases, and retrieval chains for efficient knowledge retrieval.

Technical Skills

- DSA:** 200+ problems solved
- Languages:** Python, C, C++, Java, JavaScript
- AI/ML:** LangChain, Scikit-learn, NLP, RAG, Prompt Engineering, Semantic Search, LLM Integration
- Vector Databases:** FAISS, ChromaDB
- Web Technologies:** HTML, CSS, JavaScript, React
- Tools:** Git, GitHub, Canva, Microsoft Excel, PowerPoint

Achievements & Awards

- Tata GenAI Powered Data Analytics Job Simulation — (2026).
- Oracle Agentic AI Certified Foundations Associate (2026).
- AWS Foundations of Prompt Engineering (2026).
- Google Prompting Essentials — Coursera (2026).
- Google AI Essentials — Coursera (2026).

Hackathons

- Smart India Hackathon (SIH) 2024 — Internal Hackathon Participant
- Smart India Hackathon (SIH) 2025 — Internal Hackathon Participant
